B.S. Computer Science, University of Illinois, Urbana-Champaign

Graduation Date: December 2016

Cumulative GPA: 3.79/4.00 Technical GPA: 3.88/4.00

Honors: Dean's List, James Scholar

Phi Eta Sigma

EXPERIENCE

American International Group
Virtual User Computing Intern
Fort Worth, TX
Summer 2015

- Engaged with client teams to design and implement a scalable process to support the expedited transition of 15000 users to a Citrix Virtual Environment
- Formulated a data model to process new requests into a relational database using SQL
- Achieved transparency in the decision making process by implementing an interactive dashboard using Microsoft PowerBI
- Automated the request process using Powershell to cross validate multiple data sources

University of Illinois
CS 241 Course Assistant
Urbana, IL
Fall 2015

- Developed and redesigned machine problems for topics in Systems Programming involving Multi-Threaded Programming, Memory Allocation, MapReduce as well as KeyValue stores
- Designed new exam questions for online testing to test student's understanding of concepts

Rockwell Automation
Networks and Comm. Intern
Cleveland, OH
Summer 2014

- Collaborated with a team to assist clients in resolving networking and security related issues
- Examined networks and effectively administered protocols, security measures to provide secure connections for client networks and route & load balance traffic efficiently
- Utilized Wireshark, a network protocol analyzer, to inspect Ethernet/IP & TCP/IP packets

University of Illinois
CS 225 Course Assistant
Urbana, IL
Spring 2015

- Worked cohesively in a team to illustrate complex concepts involving Data Structures to a class of 400 students
- Fostered critical thinking skills in students to enable them to tackle challenging coding questions

Rockwell Automation
Process Engineering Intern
Singapore
Spring 2013

- Successfully increased the efficiency of Manual Insertion Process by 92.5 %
- Applied Lean Six Sigma concept "DMAIC" to document and analyze the process
- Pioneered the process of redesigning the Manual Insertion process in the Production Line
- Communicated with Production and Engineering teams to design comprehensive WorkAids

PROJECTS

SportsHub

- Managed a team to design a Chrome Extension that allows users to view live Sports Data
- Conducted User Testing and Hueristic Evaluation to assess effectiveness of design
- Administered the backend using Firebase and Python and the front end with jQuery and CSS

IlliniViz

- Working on creating a web app that informs prospective applicants incoming students with admission information and demographic information for UIUC
- Utilized the data vizualization library D3.js and R to bring about interactivity

DoorHop
HackIllinois2015

- Designed an WebApp to virtualize the concept of having a personal assistant
- Integrated NFC card readers on doors to build a service that links ID cards to a messaging system to keep track of visitors
- Used Twilio REST API to send messages, initiate voice calls and retrieve and log conversation

LastLayer
MHacks 2014

- Integrated Raspberry Pi, RFID scanners and Twilio to build a two-factor authentication system
